PROFILE INFO

With over 9+ years of experience in front-end development, I am a seasoned professional dedicated to crafting exceptional user experiences. Throughout my career, I have honed my skills in HTML, CSS/SCSS, JavaScript, and various frameworks like Vue JS to create dynamic and visually appealing interfaces. My expertise extends to responsive design, clean UI/UX implementations, & performance optimization, ensuring seamless interactions across devices and platforms.

As a senior front-end developer, I thrive in collaborative environments and work independently. I am passionate about putting my best foot forward in helping my clients achieve their goals through clear communication, setting proper expectations, and prioritizing business success through impactful web experiences.

SKILLS

- Vue JS (v.2 & v.3)

WORK EXPERIENCE

Sr. Frontend Developer

FEB 2019 - PRESENT

Full Scale · Cebu PH · Full-time

- Tasked with the migration of pages from Vue.js 2 to Vue.js 3, improving performance, resolving technical debt, and enhancing UI/UX.
- Developed and maintained CRM & CMS platforms for U.S. clients and in-house projects.
- Built new features, fixed bugs, and optimized performance to meet client needs, working independently or in a team.
- Acted as a technical leader, providing strategic solutions to unify development efforts, enhance scalability, and ensure a logical approach to feature implementation.
- Suggested system improvements, including UI/UX enhancements and structural optimizations.
- Managed front-end tickets, setting clear priorities and expectations.
- Conducted code reviews and testing, ensuring quality and best practices.
- Promoted coding standards to minimize technical debt and improve maintainability.
- Communicated effectively with teams, stakeholders, and clients.
- Effectively carried out own tasks assigned & supported other devs in the Frontend development like: VueJS, CSS/SCSS, Javascript, Node.js, WordPress, HTML5, Bootstrap, Vuetify, Vuex, Pinia, Typescript.

Sr. Frontend Developer

SEP 2023 - FEB 2024

ZEA Informatique Inc · Canda · Freelance

- Responsible for developing new features and fixing bugs for an ongoing reservation system, designed for clients with functionality similar to Airbnb.
- Entrusted with reviewing code from frontend developers to ensure quality, scalability, and maintainability.
- Tasked with identifying and resolving bugs in existing implementations, applying updates, and enforcing coding standards for better performance and readability.
- Demonstrated expertise in frontend development by tackling complex challenges and delivering high-quality solutions.
- Utilized Vue.js 3, Pinia, JavaScript, jQuery, HTML, CSS/SCSS, and Bootstrap, incorporating Lodash to handle complex logic efficiently.

Software Developer

Aug 2016 - Feb 2019

Vauldex Inc · Cebu PH · Full-time

- Tasked to work on the company's CRM & CMS website.
- Responsible for developing new features and fixing bugs in ongoing web applications, working both independently and collaboratively. Utilized HTML5, CSS/SCSS, JavaScript, Vue.js, Scala, AKKA, and PostgreSQL.
- Presenting ideas for system improvements, including system design and structure.
- Produced detailed specifications and wrote the program codes.
- Tasked to test services in controlled, real situations before going live.
- In charge of the preparation of training manuals for users and future developers.
- Demonstrated accountability for the maintenance of the systems once they were up and running, working with both front-end and minor back-end functionalities.
- Assigned as a trainer for new recruits (Basics of HTML5 & CSS/SCSS, Javascript)

Wordpress Developer

Mar 2016 - Jun 2016

Proweaver Inc · Cebu PH · Full-time

- Tasked to convert Xara files to WordPress as basic responsive CMS websites
- Entrusted with the adding, and applying given content from clients to their websites, as well as creating social media accounts for them, this depends on the details added for the task.
- Displayed professionalism: followed company implemented rules, followed instructions from team leads, embraced constructive criticism as a way to do and be better, was never tardy nor gone on a leave without team lead/management's knowledge.

Junior Software Engineer

Jan 2015 - Jan 2016

iXBASE Inc · Cebu PH · Full-time

- Responsible for the development of a POS Web Application System for local clients with small to medium businesses
- Entrusted with the maintenance of existing projects that are in need of fixing.
- Responsible for the creation of the Database Architecture focusing on efficiency and clean coding.
- Diligently and honestly reported to team leads as well as managers.
- Delivered work and communicating to the team updates, suggestions and also questions.
- Aligned with a detail description to report when needed for discussion purposes since I've worked with and without a team tackling tasks with PHP (with Codeigniter Framework), Bootstrap, MySQL, Javascript, JQuery, CSS/SASS, HTML.

PHP Developer

Dec 2014 - Jan 2015

OutsourceSg · Cebu PH · Contract

- Entrusted to develop a system integrator with the use of PHP, MySQL and Javascript; combining client database from CSV files.
- Showed willingness of focusing on what has to be done, asked questions to better inline the project functionalities to the needs of the users.
- Embodied integrity despite not having clock in and clock out, logged only what I earned.
